How to connect to X-FlightServer.net with the Vulcan compatible Swift Pilot Client

1. Watch the very good tutorial, made by "FlyingFox":

https://youtu.be/iBcy72CRYSI

- 2. Download and install the Swift Version 0.9.5.113 (or later) like explained in 1.
- 3. Install model set like explained in 1.
- 4. Start the swift gui and click on connect and there "other servers"

7. Click on connect again, assure that "other servers" is highlighted and then connect

Sometimes, you have to correct the aircraft and airline.
